

## Farm animal worded problems

Help farmer Debbie to sort out some problems with her pigs.

- 30 pigs are in Farmer Debbie's field, 3 get out into another field. How many are left?
- If there are 60 pigs in a field and they need to be split into groups of 10 as they get older, how many groups does Debbie need to split them into?
- 10 mummy pigs have had 10 piglets each today, how many piglets are there altogether?
- Debbie has taken delivery of 8 new mummy pigs and she has 52 already, how many will she have altogether?
- 41 piglets were born yesterday and 59 were born the day before, how many piglets have been born in the last 2 days?
- Debbie has to half her pigs and move them to another farm, she has 80 pigs, how many pigs will be on each farm?
- When the pigs get big, they need to be in pens of 5 so they have lots of room, how many pens will Debbie need for 30 pigs?
- 80 pigs are in one field and 8 need to be moved to another field, how many will be left?
- Debbie needs to fit a feed bowl for every 10 pigs in a building, she has 90 pigs in the building, how many feed bowls does she need to put in?
